Wisp

Pediatric nasal mask

**Rediscover
dreams**

support

for you and your child

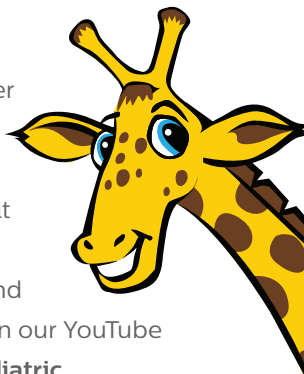

The Wisp pediatric mask has a fun, child-friendly giraffe print and soft, fabric materials. To help ease children into therapy and feel

more comfortable with the mask, we've created a fantasy world featuring our cartoon giraffe character, Jacky, and friends Sami the Seal and Tucker the Turtle.

Jacky's adventures and other resources to help you and your child get comfortable with therapy can be found at **www.dreammapper.com**.*

You can also watch Jacky and our demonstration videos on our YouTube channel: **philips.to/wisppediatric**.

*To see which therapy devices are compatible with DreamMapper, visit www.dreammapper.com/compatible.

Minimal contact, **maximum comfort**

Wisp pediatric nasal mask— designed specifically for children

Wisp pediatric applies a child-friendly fabric pattern, a modified cushion curvature, and family support tools to provide a positive experience for your child.

- The cushion shape is designed to fit the curvature of an infant's face and nose.
- An open line of sight allows children to comfortably wear the mask during their normal daily activities.
- A Leak Correction Dial lets you adjust the mask without removing it or waking the child.
- Its three cushion sizes are designed specifically for young children.

Supporting your family with our family of products

The Wisp family of masks

Serves infants to adults, providing continuity and consistency in their therapy experience.
